

Veritas TM System Recovery 23 and Veritas TM System Recovery 23 Manager Software Compatibility List

Created on August 29, 2024

Introduction

Listed below are the available operating systems, platforms and applications specifically supported by Veritas to be compatible with Veritas™ System Recovery 23. This list includes the VSR family of products namely, Veritas System Recovery 23, Veritas System Recovery Granular Restore Option and Veritas System Recovery 23 Manager.

1. Compatibility with other Veritas products

Compatibility with other Veritas products is important to the VSR team. Out of practical necessity, any efforts to ensure compatibility are limited to Veritas products that are current or, in other words, have not had an End of Life (EOL) announcement. Any exceptions or limitations for any Veritas product to this policy are noted here.

VSR cannot create a backup at the same time Continuous Protection Server (CPS) is running.

2. General compatibility notes

- VSR is Volume Shadow Copy Service (VSS) compliant. For VSS-aware database environments; example Exchange, SQL Server, and so on; VSR ensures that system state information is accurately captured.
- In case, if Windows Server 2012 is not supported by the hypervisor, VSRD version 23 may not boot successfully on virtual machines running on such hypervisors

3. Veritas support of 3rd party manufacturer products

Veritas will cooperate with 3rd party vendors, and attempt to assist in the diagnosis of problems found between the 3rd party and Veritas products. Veritas Technical Support on the combination of Veritas and 3rd party products listed in this document is conditional on the 3rd party product being supported by the original manufacturer or vendor. If the original vendor has ceased providing support for a version of their product, Veritas also will no longer be able to provide support on that product in combination with our products.

4. Minor "dot" version support

The contents of this document including 3rd party applications, databases, operating systems, in combination with Veritas products represent what has been tested in Veritas labs, or in Veritas-supervised partner labs, but is not intended to be a complete list of supported products and versions. Manufacturers of these products may frequently release minor version updates to their products as maintenance during their product's normal life cycle. (example version 1.x.x.x) that may not be explicitly listed in this document. In these situations where the base or major version of the product is listed as supported in this document but the minor maintenance update is not, Veritas will provide "reasonable effort" support on these versions until specific testing of them has completed.

5. Not every combination of software and hardware is tested.

Veritas provides best efforts to qualify Veritas System Recovery 23 with as many different operating systems, service packs, hardware platforms, database application service packs, and other applications as possible. However, due to the number of combinations, it is not possible to test all combinations for compatibility. If a particular service pack or version is not listed as specifically tested by Veritas, it may work fine, but has not been explicitly tested by Veritas with Veritas System Recovery 23.

Supported Software

The newly added software are included into this list for each release. For more details, see the features in the respective sections, via bookmarks.

VSR Section

- Windows 10 – Version 22H2 (2022 Update)
- Windows 11 – Version 22H2 (2022 Update)
- Windows 11 – Version 23H2 (2023 Update)

VSRM Section

- Windows 10 – Version 22H2 (2022 Update)
- Windows 11 – Version 22H2 (2022 Update)
- Windows 11 – Version 23H2 (2023 Update)

Product Legend

Acronym	Product/Option
VSR	Veritas System Recovery
VSR GRO	Veritas System Recovery Granular Restore Option
VSR-M	Veritas System Recovery Manager

Contents

<u>Veritas System Recovery 23</u>	<u>Veritas System Recovery 23 Granular Restore, included with VSR.</u>	<u>Veritas System Recovery 23 Manager</u>
-----------------------------------	--	---

Veritas System Recovery 23

Supported languages for the System Recovery 23 are as below:

Chinese (Simplified), English, French, German, Japanese, and Spanish

Veritas System Recovery 23 no longer supports 32-bit clients.

Veritas System Recovery is supported on Windows Server and Desktop machines for x86-64 architecture (Intel 64 and AMD64).

Also requires:

Notes:

- By default, Windows 11, Windows 10, Windows Server 2016, Windows Server 2019, and Windows Server 2022 operating systems are installed with .NET Framework 4.6 or later.
- If the required .NET Framework versions are not already installed, the Veritas System Recovery installation program automatically installs them on your computer.
- Restoring Dynamic Disks in the Veritas System Recovery (VSR) Veritas Recovery Environment (VRE). See the following article for additional support limitations. [<http://www.veritas.com/docs/000037965>](http://www.veritas.com/docs/000037965)
- While Veritas System Recovery can be installed on Windows Server Core, it is an Agent only install. Windows Server Core does not support .NET and thus the UI cannot be installed. Windows Server Core is supported via a headless agent only. No push install is supported. Agents running on Windows Server Core cannot be managed by VSR-M. Windows firewall changes must take place before Veritas System Recovery can be managed remotely. See [<http://www.veritas.com/docs/000100457>](http://www.veritas.com/docs/000100457) for more details about what must change in the Windows firewall to remotely manage Veritas System Recovery.

1. Veritas System Recovery cannot discover Striped and RAID5 InfoScale created volumes or any other volumes that are part of the same disk group where the Striped or RAID5 volumes are available.
2. Veritas System Recovery supports all InfoScale products.

File System Compatibility

File System Compatibility

File System	Version	O/S
NTFS	3.0	All VSR supported Windows platforms
NTFS	3.1	All VSR supported Windows platforms
ReFS [1]		All VSR supported Windows Server 2012, Windows Server 2012 R2, Windows Server 2016, Windows Server 2019, Windows Server 2022 Windows 8.1 x64, Windows 10 x64, Windows 11 x64 platforms
FAT32		All VSR supported Windows platforms
FAT16		All VSR supported Windows platforms

1. Support is for data volumes only.

Veritas System Recovery 23 Granular Restore, included with VSR.

- Also requires:
- Microsoft Outlook 2007, Outlook 2010 64-bit for Exchange restore.
 - Limited support for Outlook 2013 in Veritas System Recovery 23. For more details please refer to <<http://www.veritas.com/docs/000023565>>
 - VSR 23 recovery points are produced from an Exchange server for Exchange restore. Cluster and Cluster Continuous Replication environments are not supported.
 - While Veritas System Recovery can be used to protect individual servers in Exchange DAG Configuration and individual Mailboxes can be restored in GRO, DAG failover conditions are not supported.

- Notes:
- GRO does not support Exchange 2016 and Exchange 2019.
 - By default, Windows11, Windows 10, Windows Server 2016, Windows Server 2019, and Windows Server 2022 operating systems are installed with .NET Framework 4.6 or later.
 - Included with VSR Windows Editions only.

Veritas System Recovery 23 Manager

Veritas System Recovery 23 Manager (VSR-M): Veritas System Recovery managed clients

- Veritas System Recovery 23 Manager can manage all Veritas System Recovery 23, Veritas System Recovery 22, Veritas System Recovery 21 (21.4 and above) clients. Refer Veritas System Recovery 'Operating System Compatibility' section for client supported OS.
- Veritas System Recovery 21.x Client should be upgraded to VSR 21.4, in order to be managed by Veritas System Recovery 23 Manager.
- Veritas System Recovery 23 Manager will continue to monitor and manage the earlier supported versions of Veritas System Recovery 32-bit clients.
- Veritas System Recovery 23 Manager by default, installs its own instance of Microsoft SQL 2019 Express.
- Veritas System Recovery 23 Manager requires .NET framework 4.7.2 or later for installation.

- 1. Physical to Virtual conversion of ESXi 5.1 is not supported by Veritas System Recovery 16 SP2 and later.
- 2. P2V to ESXi 6.5 is supported by Veritas System Recovery 16 SP2 and later.

End-of-Life Information

EOL Notice: These operating systems, backward compatibility for restores, rolling upgrades, third-party software applications, and Veritas products are no longer supported for use with this version of Veritas System Recovery.

The Version EOL Started column identifies the version of Veritas System Recovery that no longer provides the support and includes all subsequent releases. To provide Veritas with direct feedback, please use the Veritas System Recovery forum located here: <https://vox.veritas.com/t5/System-Recovery/bd-p/system-recovery>
